

FTTH / FTTx Infrastructure

Beirut, Lebanon

30th Aug. 2020

V1.0

Photo Album to Jim Hayes / FOA

By Omar Rawdah

Removing old copper & Reusing existing ducts / Sub-ducts- Distribution Network- OSP

FTTx / FTTH nodes (splice enclosures) & OSP Infrastructure

FTTH C.O. work-in-progress. Ogero Telecom

OLT splicing cassettes & PON splitters installed and tested, awaiting active OLT units. Fibre cabling management is essential.

Examples of FTTO/FTTH Infrastructure- Beirut

**P2P FTTO (Enterprise) &
GPON FTTH (Residential)**

Examples of FTTA Infrastructure

Examples of FTTH Infrastructure & Installations - MDU complex - Two Service Providers

Examples of FTTH Infrastructure & Installations - Mid-Rise MDU

Riser Cable Laying From the roof top to the shared Telecom room and step transitions

Riser Cable Branching and fixing of the branch unit

Examples of FTTH Infrastructure & Installations - Mid-Rise MDU

Examples of FTTH Infrastructure & Installations - MDU - New Development

Example FTTH Infrastructure

Only one riser cable per block

Fibre optics riser cables protected by PVC ducts & FDBs

Only one riser cable per block

Fibre optics cables protected by ducts & clearly labeled

Fibre optics home outlets

Tilal Beirut Tower (Achrafieh) & The Palms (Ramlet El Baida)

Titanium Tower 1 (Ain El Tineh)

Examples of FTTH Infrastructure & Installations - Old Properties

Examples of FTTH Infrastructure- Older Properties

Photo (Left) shows FTTH BDB adjacent to legacy PSTN infrastructure. Clear identification of FTTH wiring essential.

Photos (Above) show FTTH wiring adjacent to MDU power cables; labeling of FTTH riser ducts and separation from power essential.
